- Website Development
- Graphic Designing
- Mobile APP application
- Digital Marketing
- Basic Tally
- Microsoft Office package

Traning and programs

- BOOTCAMP
- Internship
- Digital marketing

Our
Tools &Tech

How
We works

| Initiation | Planning | Execution | Monitoring and Controlling | Closure |

1. Initiation
Every project begins with initiation, where the idea is defined and approved.
It sets the foundation by identifying objectives, scope, and stakeholders.

2. Planning
Planning involves creating a detailed roadmap for achieving project goals.
It covers timelines, resources, budgeting, and risk management.

3. Execution
Execution is where the actual work begins according to the plan.
Teams collaborate to deliver tasks and produce the desired outputs.

4. Monitoring & Controlling
This phase ensures the project stays on track with planned goals.
Progress, quality, costs, and risks are continuously monitored and adjusted.

5. Closure
Closure formally ends the project after successful delivery.
It includes documentation, evaluation, and learning for future projects.

OUR
Core Team

Ayush Shapkota
C.E.O

Sagun Subedi
M.D

Abishek Sardar
PM-Developer

Prabhat Rai
coo-Designer

Bigyan Prasad Rijal
Backend Developer
